COMMUNITY, LEISURE & HEALTH FACILITIES

With regard to other facilities in the area, a total of fifty four different services exist.

There are a number of charitable organisations within Bilston including two counseling services, two hostels and three housing association offices. Clubs and associations and community and day centres are well provided with a total of nineteen different organisations within 1.2 miles of the site. The elderly and disabled are catered for with three residential care homes, a home care centre and resource centre and a disabled equipment supplier.

There are no police or ambulance stations in the area but a fire station is located on Prosser Street.

Nine different religious organisations are located within a mile of the Bilston site which cover a range of denominations and there are three social services offices in the area.

Gym and leisure centres are located at Prouds lane and slightly further away on Darlaston Way and there are seven different health centres or surgery's in the area.

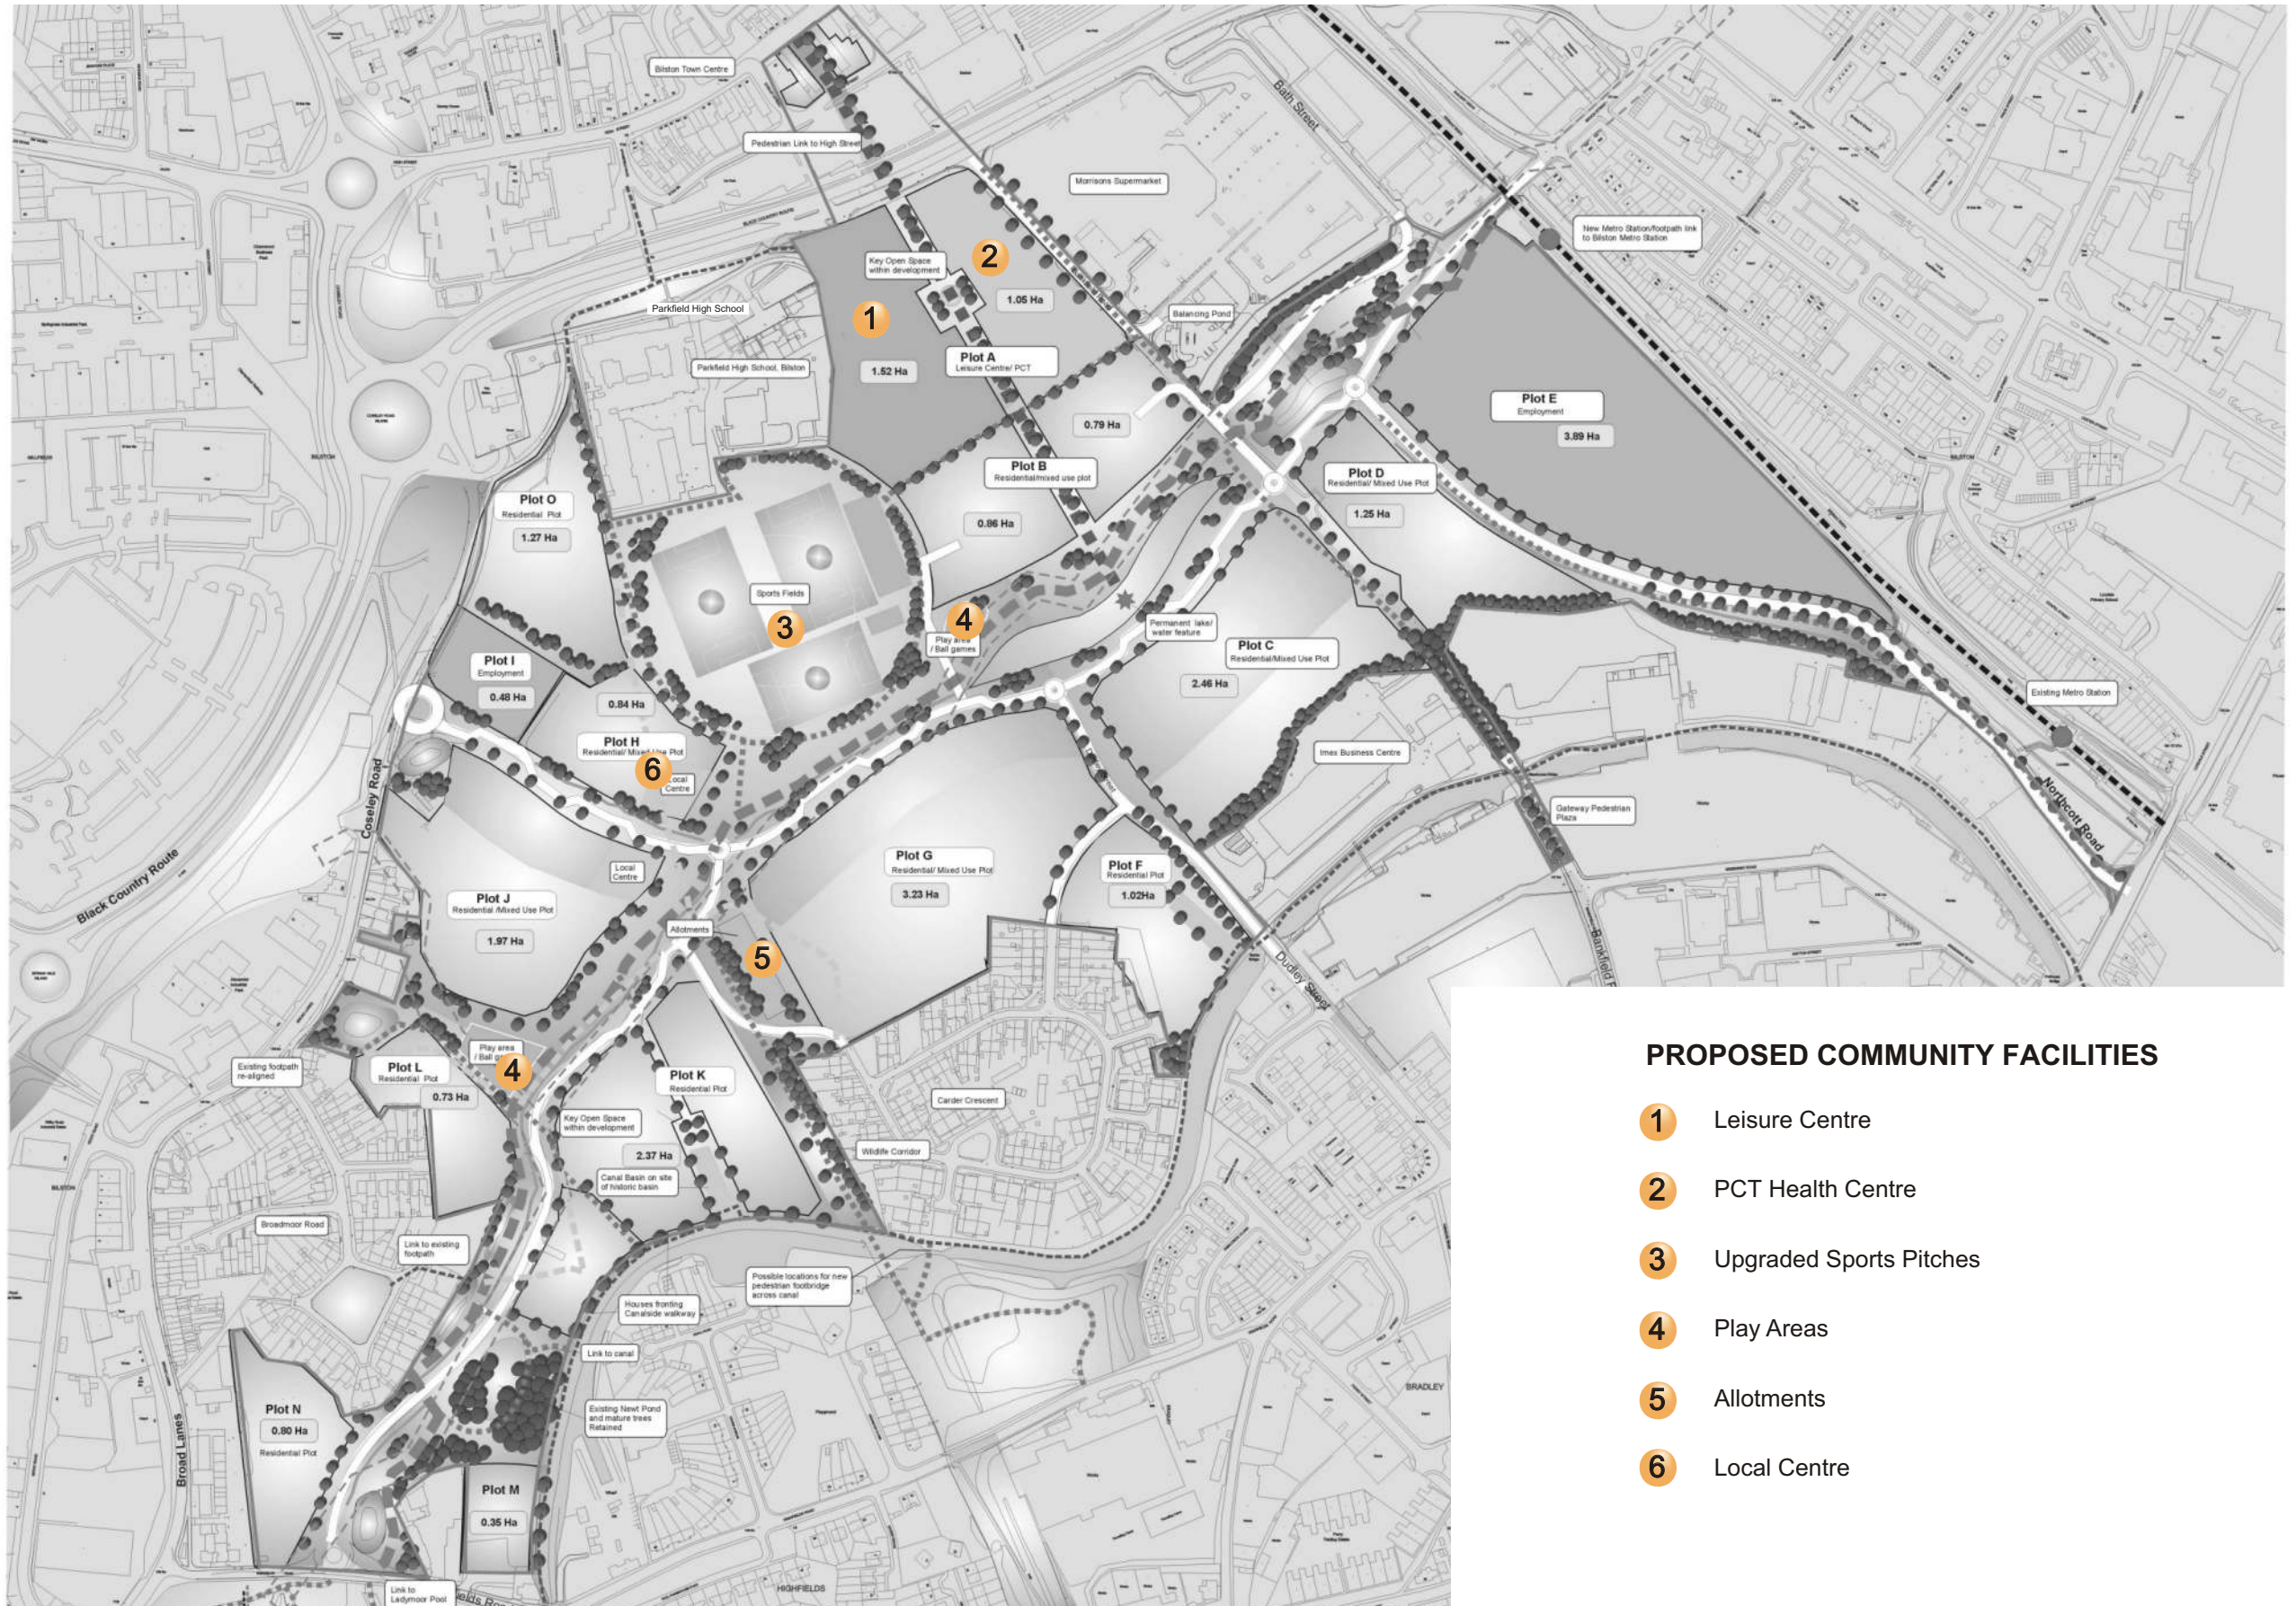

STRATEGY

Access to these existing services will be improved via bus routes, cycle ways and pedestrian links.

Existing provision for Sport and Leisure is poor within the area and additional community facilities will therefore be included within the Bilston Urban Village Development.

- 1 A new leisure centre is proposed towards the north of the site, off the Black Country Route and this will include for example, swimming pools, dance studios and a sports hall.
- 2 This will be located opposite to a PCT Health Centre. Between these two buildings, an important pedestrian link is to be created which will improve access to the town centre by continuing over the Black County Route. This should encourage new residents to visit the town centre.
- 3 Sports facilities will also be improved with the upgrading of the existing sports pitches by Parkfield High School off Prosser Street.
- 4 Children will especially be catered for with the provision of two play areas with play equipment, one of which will be suitable for ball games.
- 5 Allotments are to be located towards the east of the site where greater remediation of the ground conditions will be required, and a local centre will be provided near to residential plots to the west. The facilities within this centre are not as yet defined.

It is intended that the new development will integrate with the existing local community of Bilston by encouraging the increased use of existing facilities and providing new services for new and existing residents.

PROPOSED COMMUNITY FACILITIES

- 1** Leisure Centre
- 2** PCT Health Centre
- 3** Upgraded Sports Pitches
- 4** Play Areas
- 5** Allotments
- 6** Local Centre
